

Automated “Follow-Me Cart”

Using AI and Computer Vision for Disabled and Elderly Assistance

is a state-of-the-art mobility solution designed to assist elderly and disabled individuals. Utilizing AI, computer vision, and a mobile application, the cart follows the user autonomously while avoiding obstacles. It combines intuitive technology with robust engineering to ensure safety, convenience, and independence for its users.

Key Features

AI-Powered Gesture Recognition
Hands-free, intuitive control.

Obstacle Detection & Avoidance
Real-time safety for smooth navigation.

Autonomous User Following
Enhances mobility and independence.

Durable & Portable
Designed for various terrains with extended usability.
